GOAL

One of my goals is to demonstrate that the adoptions of new technologies doesn`t have to be a difficult process and not only improve the efficiency of the company but also improve the qualities of life of employees. Also, to show that ethical practices give more development the others.

RAMIREZ ZUARES

- SQL
- Express.js
- Advanced EXCEL
- Sass
- Node.js
- React.js

- JavaScript
- HTML 5
- CSS

WORK EXPERIENCE

Jaunuary-2019 - Dicember-2019

During the time I prepare to apply to college I worked as a teacher providing mate classes to students preparing to enter to college. I have given group classes to 20 students in a classroom.

November 2020 – November 2020
During the protest driven by my necessity to help the others I led two groups of 5 people each of them. who worked as a team to take the injured to first aids.

August 2019 – Present

Throughout my path of learning software development, I have had to collaborate with different people to create a product in different projects.

Here I show a product part of my portfolio and collaboration with UX designers:
